CAREER OBJECTIVE

As a computer science student, my objective is to secure a position that provides an opportunity to apply my theoretical knowledge and practical skills in software development, and computer programming, while continuously learning and growing in a dynamic and challenging work environment.

EDUCATION

- Joginpally B.R. Engineering College, Hyderabad** **2018-2022**
B.Tech in Computer Science and Engineering CGPA : 6.62
- Sri Chaitanya Jr Kalasala, Hyderabad** **2016-2018**
MPC | Intermediate State Board Percentage: 82%
- Kerala Model High School** **2016**
Secondary Education CGPA : 8.2

PROJECTS

- Personal Portfolio Website | [git](#)**

Impressive portfolio website highlighting my education, skills, and projects, built with HTML, CSS, and Bootstrap.

- Detecting the movement of objects with webcam |**

object movement is detected through webcam although there are various methods .each algorithm is found efficient in one way. But there exists some limitations in each of them. In our system those disadvantages like absence of motion detection functionality requires a lot of processing resources, archive space used to store videos is too high are omitted and combining the usage of best methods.

- Improvement In Automated Dignosis Of Soft Tissues Tumours Using Machine Learning**

Soft Tissue Tumours are a form of sarcoma found in tissues that connect, support and surround body structures. because of their shallow frequency in the body, they appear to be heterogeneous when observed through MRI. They are easily confused with other diseases and these diagnostic errors have a considerable detrimental effect on the medical treatment. therefore we propose a machine learning based approach which combines a new techniques of pre-processing the data for features transformation ,resampling techniques to eliminate the bias for feature deviation of instability.

SKILLS

C Programming

Python

Java Programming

HTML

CSS

JavaScript

Node JS

SQL

Communication Skill

Team Player

CERTIFICATIONS

- Fullstack web development at infosys spring board
- JAVA Programming (Jspiders)
- Master frontend to backend at geeks for geeks

LANGUAGES

- English
- Telugu
- Hindi
